Ultraformer III is the premium multi-functional ultrasound (MFU) device which is capable of dermal and deep dermal micro heating as well as SMAS contraction for a multi-layered lifting and tightening effect.

The highly-focused energy heats target areas to temperatures of 60-70 °C, the ideal range to denature collagen and facilitate micro tissue contraction without damage on the skin surface at all.

It is completely non-invasive treatment without downtime and excellent for face lifting, skin tightening, wrinkles, pores, V-line forming, jowl line, cheek shaping, skin tone and choler improvement.

What is Botox Treatment?

Botox blocks the signals from nerves to muscles. It prevents facial wrinkles that are caused by muscle movement, such as laughing or frowning so when these muscles are prevented from contracting for a period of time, the wrinkles will eventually relax and fade.

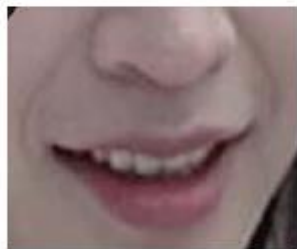

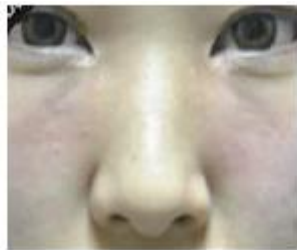

What is One-day Square Jaw botox?

Non surgical Botox to achieve a V-line (slim line) by releasing the muscles around jaws.

- Hyaluronic is a natural substance found in human body
- Adding volume to the skin through tiny injections : smoothing facial folds and wrinkles in the treated area or making the treated area fuller.
- Instant result after procedure.
- No downtime.

Glutathione IV

A substance produced naturally by liver and it is used for maintaining immune system, fighting metal and drug poisoning. Strong *Antioxidant* that removes free radicals as well as *detoxify liver* and cleanses heavy metals and pollutants. Also, it prevents the activation of enzymes called Tyrosinase which plays a role in producing *melanin* (cause of pigmentation)

Multi blue IV (Mineral Microelements)

The optimum injection for aging disease prevention by providing the minerals microelements (Selenium, Zinc, Copper, Managanese and chrome) which are necessary for the body but easy to be lack. It removes the active oxygen causing much disease and aging with selenium which is 2000 times stronger antioxidative activity than vitamin E
